Q1: In this question you will design a form to help a customer order food and pay the total price.

The following table shows the menu and price.

Menu	Price without Meat	Price with Meat (Yes)
1.Hamburger	$5.5	$8.5
2. Pizza	$5.5	$8.5
3. Fish and Chips	$5.5	$8.5
4. Salad	$5.5	$8.5
5. Sandwich	$5.5	$8.5
6. Exit		

In the form, first prompt the customer to the choice based on the restaurant menu and validates the information and compute the price.

- An integer choice should be the number displayed on menu from 1 to 6.
- Your program should be able to ask user a new choice
